Nuvectra Added to the Russell Microcap[®] Index

Plano, Texas, June 27, 2016 – Nuvectra Corporation (NASDAQ: NVTR), a neurostimulation medical device company, announced today that it has been added to the Russell Microcap[®] Index. The addition occurred at the close of trading on June 24, 2016 when FTSE Russell reconstituted its comprehensive set of U.S. and global indexes.

Membership in the Russell Microcap[®] Index, which remains in place for one year, provides automatic inclusion in the appropriate growth and value style indexes. FTSE Russell determines membership for its Russell indexes by objective, market-capitalization rankings and style attributes.

“The addition to the Russell Microcap Index will help expand awareness of Nuvectra in the investment community and is another positive development since becoming a public company,” said Scott Drees, Chief Executive Officer. “Nuvectra is well positioned with our differentiated, IP-protected neurostimulation platform with a significant first opportunity in the large and growing \$1.7 billion market for spinal cord stimulation. We are on track with our sales force hiring and have received positive feedback on the Algovita system from our initial commercial activity.”

Indexes provided by FTSE Russell, a leading global index provider, are widely used by investment managers and institutional investors for index funds and as benchmarks for active investment strategies. Approximately \$6 trillion in assets are benchmarked against the Russell US Indexes.

For more information on the Russell Microcap[®] Index and the Russell US Indexes reconstitution, go to the “Russell Reconstitution” section on the [FTSE Russell website](#).

About FTSE Russell

FTSE Russell is a global index leader and data provider that provides innovative benchmarking, analytics and data solutions for investors worldwide. FTSE Russell calculates thousands of indexes that measure and benchmark markets and asset classes in more than 70 countries, covering 98% of the investable market globally.

FTSE Russell index expertise and products are used extensively by institutional and retail investors globally. Approximately \$10 trillion is currently benchmarked to FTSE Russell indexes. For over 30 years, leading asset owners, asset managers, ETF providers and investment banks have chosen FTSE Russell indexes to benchmark their investment performance and create ETFs, structured products and index-based derivatives.

A core set of universal principles guides FTSE Russell index design and management: a transparent rules-based methodology is informed by independent committees of leading market participants. FTSE Russell is focused on applying the highest industry standards in index design and governance, and embraces the IOSCO principles. FTSE Russell is also focused on index innovation and client collaboration as it seeks to enhance the breadth, depth and reach of its offering.

FTSE Russell is wholly owned by London Stock Exchange Group. For more information, visit www.ftserussell.com.

About Nuvectra Corporation

Nuvectra™ is a neurostimulation company committed to helping physicians improve the lives of people with chronic neurological conditions. The Algovita® Spinal Cord Stimulation (SCS) System is our first commercial offering and is CE marked and FDA approved for the treatment of chronic pain of the trunk and/or limbs. Our innovative technology platform also has capabilities under development to support other neurological indications such as sacral nerve stimulation (SNS), and deep brain stimulation (DBS). In addition, our NeuroNexus subsidiary designs, manufactures and markets leading-edge neural-interface technologies for the neuroscience clinical research market.
